qbo

QBO mirrors es una colección de espejos fabricados combinando nuestras tiras de LED y perfiles. Espejos con luz que reflejan y amplían los espacios.

Están disponibles en distintas dimensiones, acabados, formas y tipos de emisión de luz. Se puede alternar entre luz frontal y trasera o ambas, según el ambiente y uso que se desee en cada espacio.

Están diseñados en medidas estándar que facilitan la composición entre las distintas formas (rectangular, cuadrado y redondo). Cada espacio tiene unas condiciones concretas, por eso, se ofrece el servicio para customizar los espejos.

QBO mirrors is a collection of mirrors mounted with QBO LED strips and profiles. This mirrors with light reflect and expand spaces.

They are available in different dimensions, finishes, shapes and types of light emission. It is possible to alternate between frontal and back light or even both, depending on the environment and use desired for each space.

There are standard dimensions which allows the composition between the different shapes (rectangular, square and round). Knowing that each space has specific conditions, we also offer customized mirrors.

A photograph of a glass with the 'qbo' logo on a shelf next to a glass decanter. The glass is a simple, rounded tumbler shape, and the 'qbo' logo is printed in white. It sits on a dark, reflective surface. To its right is a larger, more ornate glass decanter with a curved body and a long neck. The background is a dark, textured wall, possibly wood or stone, with a framed picture hanging on it. The lighting is warm and focused on the glassware.

MODULAR COMBINATION

Como cualquier sistema modular, las dimensiones de los espejos standard (rectangular y square), están pensadas para poder encajarlos y combinarlos entre ellos y así poder generar distintas composiciones.

As any modular system, the dimensions of the standard mirrors (rectangular and square), are designed to fit and combine them to generate different mirror compositions
